

Dear Hiring Manager,

I am writing to express my interest in the Software Development and DevOps position. With a solid foundation in backend development and a growing expertise in DevOps practices, I am excited about the opportunity to contribute to your team and help build scalable, reliable systems that drive business growth.

During my time as a Software Engineer at Dlithe in Bengaluru, I was part of a project to migrate legacy systems to a modern Spring MVC architecture. I contributed to building RESTful APIs, implementing unit tests, and optimizing MySQL queries to improve data retrieval performance. This experience honed my skills in the Java ecosystem (Spring Boot, Hibernate) and reinforced my commitment to clean, maintainable code.

In earlier roles, such as Backend Developer at Curilux and Programmer Trainee at Cognizant, I took responsibility for designing modular APIs, managing schemas, resolving defects, and collaborating across frontend and backend teams. These experiences gave me deep exposure to software engineering principles, agile methodologies, and performance-driven development.

In addition to my core development strengths, I have actively worked on DevOps-adjacent technologies: I am proficient with Docker and Kubernetes (basic level), version control via Git/GitHub, and AWS services (S3, EC2). I believe that modern software delivery demands an integrated mindset — not just writing backend logic, but also ensuring smooth deployment, scalability, and operational stability. I am eager to expand this part of my skillset and bring it into full practice in a role like this.

I am keen to join an organization where I can apply and further develop both my core development and DevOps capabilities, working on meaningful challenges alongside talented peers. I would welcome the opportunity to talk in more detail about how my background, skills, and ambitions align with the needs of your team.

Thank you for your time and consideration. I look forward to the possibility of contributing to and helping drive your technology initiatives forward.

Sincerely,
Purushottam Pattanashetty
